

REMOTE APP

Aim-

To create a remote app using figma tools

Procedure-

- Create a new frame for your app's screen (e.g., 375x812px for a mobile view).
- Design the user interface (UI) by adding components like buttons, sliders, and icons for controlling the remote features.
- Use **Auto Layout** for arranging buttons and controls in an intuitive layout.
- Create multiple screens for different states, like power on/off, volume control, and settings.
- Prototype the app by linking screens with interactive actions and transitions in the **Prototype** tab.

Result-

Successfully the Remote app has been created.
