# DELIVERY APP

Aim-

To create a delivery app using figma tools

Procedure-

- Create a new frame for your app's screen (e.g., 375x812px for mobile).
- Design the layout with essential elements like a menu, order list, map, and user profile using rectangles, icons, and text.
- Use **Auto Layout** to organize buttons, images, and content for responsive design.
- Create multiple screens for features like order tracking, payment, and confirmation.
- Link the screens with interactions in the **Prototype** tab to simulate the app's flow and transitions.
- 4o mini

Result-

Successfully the Delivery app has been created.
